OUR CURRENT MOON

NINENE - MOON OF THE CHILD (Mid December to Mid January)

The face of the young man represents youth, a new beginning, the rebirth of the animal world, and the new edible shoots.

CONNECTIONS AND BACKGROUND INFORMATION

The Winter Solstice (December 20/21) is the point at which the sun is farthest from the Equator, thus it is the darkest day of the year, and at this "turning point" the days will become longer. As with the Summer Solstice, the shortest day of the year holds great importance in many cultures.
